Sample Analysis Service

# Multiplex Cytokine Analysis Service

InBio utilise Luminex® xMAP® technology for the quantification of multiple cytokines simultaneously; reducing analysis time whilst using as little as 25µl of sample.

InBio offers a cost-effective multiplex cytokine analysis service. Our team of experienced scientists work with researchers from both academia and industry to perform cytokine analysis tailored to each project.

Some of the key benefits of working with InBio include:

- ✓ Collaborative approach
- ✓ Broad selection of cytokines and other biomarkers
- ✓ Fully customisable panels
- ✓ Human or animal specimens
- ✓ Fast turnaround
- ✓ Fully processed and analysed results
