

New England Biolabs (NEB) is renowned for service excellence and exceptional product quality. NEB manufactures molecular biology reagents and is an industry leader in the supply of restriction enzymes, polymerases, modifying enzymes and DNA ladders. The NEB offering includes *E.coli* expression systems, competent cells, reagents for PCR, qPCR, nucleic acid purification, synthetic biology, glycobiology, epigenetics, *in vitro* transcription, RNA analysis and sample preparation for next generation sequencing.

- Restriction Enzymes
- PCR, qPCR & Amplification Technologies
- Cloning & DNA Assembly
- NGS Sample Prep & Target Enrichment
- DNA & RNA Purification
- DNA, RNA & Protein Molecular Weight Markers
- RNA Synthesis
- Synthetic Biology Reagents
- Genome Editing Reagents
- Epigenetics
- Protein Expression & Purification Technologies
- Competent Cells
- Protein Tools
- Glycobiology Enzymes
